

Fair Haven: Redefining Home

Reframing, Renewing & Renovating Together

March 21, 2016

Dear Fair Haven Family and Friends:

With last month's groundbreaking now behind us, it is readily apparent that construction is fully underway at Fair Haven. Since construction began, we have seen eight of the existing cottages and one entire building removed, and the beginnings of new buildings are starting to sprout! You have no doubt noticed these efforts, and I know we all share the same excitement as we move into this phase of our progress. What a joy it will be to watch these improvements come to life!

As I shared in a previous letter, it will be my distinct pleasure to update you each month on the status of our construction and cultural change efforts. I will focus each month on a different component of our progress, and will often refer to the Fair Haven Site Plan, which is provided for you on the reverse side of this letter. Please note that Fair Haven will also send periodic notices or other announcements as the situation may warrant. Fair Haven's in-house channel ("Channel 5") and the information boards will also contain other important information.

March spotlight...**Short-Term Stay Rehabilitation Center!**

The area just to the west of Fair Haven's main building will now host a two and one-half story state-of-the-art rehabilitation center with 42 private residential rooms with private baths! Identified as "Building K" on the site plan, the rehabilitation center will feature two 21-resident households, each with a living room, den, dining room, kitchen, spa, outdoor space, and other areas, all of which are designed to provide a home-like atmosphere for residents instead of an institutional nursing environment. I have included a photograph on the reverse side of a typical household area similar to that which our rehabilitation center will feature. What a difference this will create in the lives of our residents! The lower level of the rehabilitation center will include the physical, occupational and speech therapy areas, the dental clinic, and a resident pharmacy, all combining to make Fair Haven's rehabilitation center second to none!

With construction now fully underway, we are able to project that the rehabilitation center will be completed by the end of next January. All construction should be complete by the end of August, 2017, weather permitting.

I look forward to sharing with you again next month as our journey continues. Thank you for your continued support of Fair Haven!

Very truly yours,

Christopher W. Tomlin
